

What's new in the 2021 EHRA Practical Guide for NOACs?

Monday 14th June

18:00–20:00 CET

[Register here for the webinar](#)

Dear Colleagues,

We would like to welcome you to an upcoming zoom webinar titled **‘What’s new in the 2021 EHRA Practical Guide for NOACs?’**. The webinar will take place on Monday 14th June 2021 (18:00–20:00 CET) and is organised and funded by Daiichi Sankyo.

During the webinar you will get an update on the recommendations from the 2021 EHRA Practical Guide on the use of NOACs in patients with atrial fibrillation (AF). Furthermore, a panel of international experts will discuss how the Practical Guide will help translate clinical data into routine practice with an emphasis on patients undergoing interventions and those at higher risks of stroke and bleeding.

Throughout the session, the experts will present a variety of patient cases including those of an ageing AF patient, an AF patient undergoing percutaneous coronary intervention and an AF patient undergoing cardioversion/ablation. Finally, in keeping with the patient cases discussed during the webinar, the experts will shed some light on the recommendations from the 2021 EHRA Practical Guide concerning peri-procedural management of NOACs and management of bleeding under NOAC therapy.

Participants will have the opportunity to interact with our expert panel throughout the session via the meeting platform.

We hope that you will find this webinar of interest and look forward to you joining us on the virtual platform.

With best wishes,
